

7/17/18 TC meeting excerpt

- Municipal Building – Mark Alpaugh, MJA Architecture, came to the subcommittee meeting on July 16 to explain the estimate that he provided 2 years ago. The estimate was based on a conceptual plan with little information, which is why the estimate appeared high. He talked about ways to reduce the cost and felt it could get brought down to \$400 per square foot. Alex stated that he feels Mark could be an asset at future meetings when they develop ideas. Mark was involved with the buildings in Hardyston, Sparta and Howell. Harvey spoke to Fred Braun who was one of the contractors who built the original building, and he is available Tuesday, July 24 at 7 p.m.

The next meeting is August 6 at 7 p.m.
